

SAMUEL & SONS
FALL 2025

Designed to *Endure*

At Samuel & Sons, we believe that great design is not only beautiful, it is enduring. Trimmings have long served as the final, expressive detail that brings permanence, personality, and polish to interiors. Whether rooted in heritage or crafted for performance, our trims are made to stand the test of time, both aesthetically and structurally. With every fiber, pattern, color, and intricate detail, our Fall 2025 introductions reflect a lasting commitment to craftsmanship, versatility, and thoughtful design.

This season, we are proud to present three distinct collections: Devon, Westport, and Annecy, *Third Edition*, each uniquely designed to endure.

Devon brings architectural softness to life with heirloom-quality borders rendered in sculptural scallops, crisp linen appliqué, and tailored embroidery. Inspired by classical molding and decorative motifs, the collection captures the comfort and permanence of tradition while embracing the decorative spirit of contemporary interiors. Devon offers more than ornament, it offers resonance, refinement, and warmth that lasts.

Westport exemplifies sustainable performance without compromise. Woven from recycled, OEKO-TEX® STANDARD 100 certified Sun Pro yarn, this indoor/outdoor collection combines artisanal texture with long-lasting resilience. Westport trims are UV-resistant, colorfast, and marine-grade, yet carry the same design integrity found in the most refined interiors, proof that performance and beauty can coexist, enduring through changing seasons and shifting needs.

Annecy, *Third Edition* pays homage to the refined traditions of classical passementerie. With scalloped gimps, elegant chair tassels, and lush mélange brush fringe, Annecy reinterprets timeless motifs for today's interiors. Its strength lies in the quiet complexity of its intricate textures, tailored aesthetic, and sophisticated palette, all hallmarks of enduring elegance that never feels overstated.

Each collection this season was created to elevate interiors not just for the moment, but for years to come. Explore Samuel & Sons trimmings where craftsmanship, beauty, and longevity meet in every detail.

Devon Collection

Devon is an elegant collection of fine linen appliqué, velvet and wool bordering, featuring various silhouettes in a beautiful palette of colors.

With every stitch and curve, Devon captures the heirloom quality, tailored sophistication, and subtle sensuality that define timeless interiors. Inspired by the multi-draped arch, the Cecilly Appliqué Border features a bold 3" scallop, layered in contrasting linen and finished with a satin stitched edge.

The Ainsley Scalloped Border's sophisticated double arabesque scallop pairs the refinement of linen with contrasting satin stitch embroidery, available in three soft, versatile hues. Whether gracing the hem of a Roman shade or adding a charming, layered edge to a throw pillow, its applications are as endless as they are elegant.

Missing Something?

TO TRIM OR NOT TO TRIM...

Trimmings are the defining detail that elevate the ordinary into the exceptional. The difference between an application with trim and one without is profound. What once felt flat gains dimension; what seemed incomplete is brought into sharp, intentional focus. Whether framing drapery, articulating upholstery, or imparting distinction to fine furnishings, trim introduces a layer of refinement, richness, and expressive detail. Trim doesn't just finish a piece, it transforms it. It brings intention, balance, and quiet beauty to the spaces we live in. Unfold the page to see how the smallest additions can defy expectations and outshine even the boldest piece of furniture.

Light up the room with a flourish of fringe. A lampshade is more than functional, it's an opportunity to embellish with personality and panache. Tassel fringe is a classic choice for echoing the surrounding palette and elevating a silhouette.

A pillow offers the perfect canvas for creativity, and your trimming choices can be transformative. Consider the two-toned Corsica Raffia Cord, which defines a bold $\frac{1}{2}$ " edge with confident simplicity, or the Cavallo Border's graphic framing beautifully paired with the contrasting sheen of an Aria Silk Brush Fringe edge.

A bold border is equally impactful on the edge of a seat, accentuating its shape while unlocking a world of texture, pattern, and character. Go one step further and layer it with a statement-making fringe for added impact.

Nothing says finished like fringe and it's no secret that a skirt is a game changer that can redefine an entire room. The Bali Tassel Skirt Fringe is a timeless example of elegant tradition, while the Barcelona Ombré Fringe is unapologetically contemporary. Both demand your attention.

Westport Collection

An exceptional collection of sustainable, high-performance cords, borders, and fringes in an array of strié hues, suitable for use indoors and out.

“WITH WESTPORT, OUR GOAL WAS TO CREATE A TRIM COLLECTION THAT’S NOT ONLY REFINED AND PERFORMANCE-DRIVEN BUT ALSO ALIGNED WITH THE EVOLVING SUSTAINABILITY PRIORITIES OF TODAY’S DESIGNERS AND CLIENTS. IT IS ABOUT DELIVERING EXCEPTIONAL DESIGN WITHOUT COMPROMISING ENVIRONMENTAL VALUES.”

Marisa Gutmacher
VP of Design

OEKO-TEX® STANDARD 100 certified Sun Pro yarns come together to create captivating fringes, textural cords, and brilliant borders that don't sacrifice softness or style in the name of sustainability. We took this Performance collection outdoors to cord-adorned placemats and petite, bullion-beautified table lamps, placed atop a ruffled table skirt embellished with a bloom of brush fringe. Take your seat on a border-wrapped dining chair and admire the lampshades above crowned with contrasting gimp.

CASA *cork*

A STUDY IN SUSTAINABLE DETAILS

Casa Cork by David Rockwell, in partnership with the Cork Collective and Corticeira Amorim, presented a bold vision for the future of sustainable interior design, inspired by the Cork Collective's mission to transform used natural cork stoppers into a valuable, renewable resource. We were honored to contribute inventive trimmings to this forward-thinking showcase at Milan Design Week, working with our Custom Studio to craft an impressive range of cork passementerie pieces, from a sculptural tieback to tantalizing beaded fringe.

WHY CORK?

Cork is harvested without harming the tree. The bark of the cork oak tree is stripped by hand every nine years without felling or damaging the tree. The bark regenerates, making it one of the most renewable materials on Earth.

Cork oak forests absorb 14 million tons of CO₂ annually. Even more impressively, a harvested cork tree stores up to five times more carbon as it regenerates its bark, making the use of cork not just sustainable, but actively beneficial for the climate.

More than 50% of cork's volume is air, making it naturally sound-absorbing, fire-retardant, and antimicrobial. It's a quiet material, in every sense of the word.

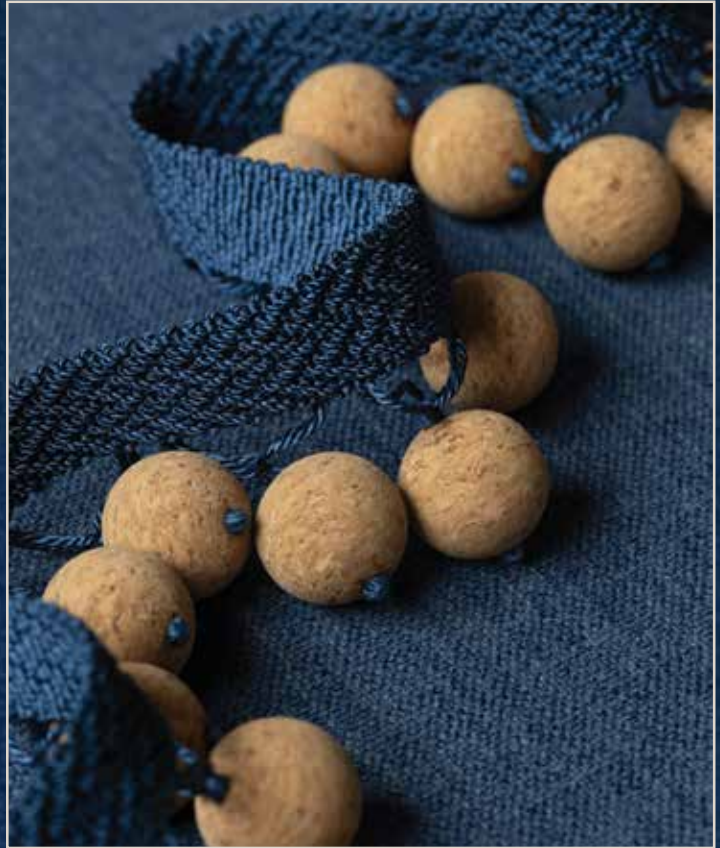

Nearly 3 billion cork stoppers are discarded annually in the U.S., and less than 1% are recycled. Imagine a future where every cork gets a second life, from the bottle to a beautiful end product.

Photography by: Top Row, Joel Santos and Magali Tarouca | Bottom Left, Daniel Rodriguez | Bottom Right, Ed Reeve for Rockwell Group

Photography by: Ed Reeve for Rockwell Group

Working in close collaboration, our Creative and Custom teams explored the material's full potential, developing everything from borders to beaded fringe in cork, reimagining classic techniques through a contemporary, sustainable lens.

Visitors entered Casa Cork through a creative curtain, swept aside by two Custom tassel tiebacks, artfully composed of cork molds and fringe that set the tone for the imaginative space beyond.

"Cork has fascinated us for years because of its incredible malleability, organic beauty, and applicability in the built environment—not to mention its sustainable properties. Casa Cork was born out of a desire to help educate designers and consumers about cork's incredible transformative properties and potential because it can be recycled over and over again—from wine stoppers to community space flooring or decorative tassels. I think we achieved a kind of cork wonderland that expanded people's perceptions and pushed the material to its limits and beyond."

David Rockwell

Annecy Collection

Third Edition

A classical collection of twisted ply cords, complemented by an intricately woven scalloped gimp, brush fringe and chair tassel in a comprehensive assortment of mélange colors.

Take a closer look at Annecy and discover the intricate mélange of hues that gives each timeless palette its seemingly effortless beauty. Consider Cadet Blue, stately and near-neutral from afar, but a closer look reveals a precise balance of tailored navy, soft gold, pale blue, and ivory, with every yarn intentionally placed to create refined richness and versatile appeal.

Dive into dimensional details with the Annecy Brush Fringe, a timeless choice for lush, tactile richness. Explore modern interpretations of this classic trimming with surprisingly contemporary applications, from framing a lampshade layered with a traditional gimp, to enlivening an accent chair with an unexpected bloom of nuanced color.

Le Jardin Collection

Le Jardin is a luxurious collection of silk Cords, Gimps, Key Tassels, Chair Tassels and Tufts in a comprehensive spectrum of tonal shades.

Aria Collection

Aria is a lustrous, dimensional silk brush fringe offered in a full range of sumptuous tonal shades.
